HinovaFan - Aquaponic

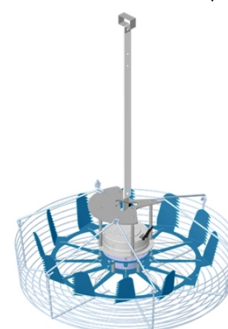

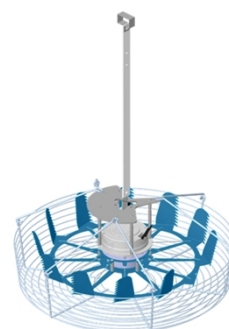

Dear Ms. Syren,

Thank you for your interest in our fan, enclose you will find a quote.

We are pleased to offer the delivery of our vertical recirculation fan.

Ventilation is an important aspect of the climate in your greenhouse. Vertical air movement in the crop is good to keep transpiration going and to prevent moisture accumulation and therefore fungal diseases. The HinovaFan reduces negative effects due to moisture and heat in a simple and energy-efficient method. Vertical airflow through the crop results in an optimal microclimate.

Quantity	Description	
1 pc.	<b>HinovaFan AC</b> <ul style="list-style-type: none"><li>• Nice aerodynamic design</li><li>• Vanes equipped with whisper-quiet technology</li><li>• Covered area of 2700 Square feet / 256M<sup>2</sup></li><li>• Long-term lubricated bearings, very quiet</li><li>• Can be used for various type of crops</li><li>• 1 ~ 230V ±10%, 50Hz P1 260W 1,2A</li><li>• 1 ~ 230V ±10%, 60Hz P1 300W 1,3A</li><li>• Simple and low maintenance</li><li>• Incl. basket, mounting strip and truss bracket</li><li>• Incl. power cable 2M</li></ul>	€ 420,00

### Global layout of the vertical fans

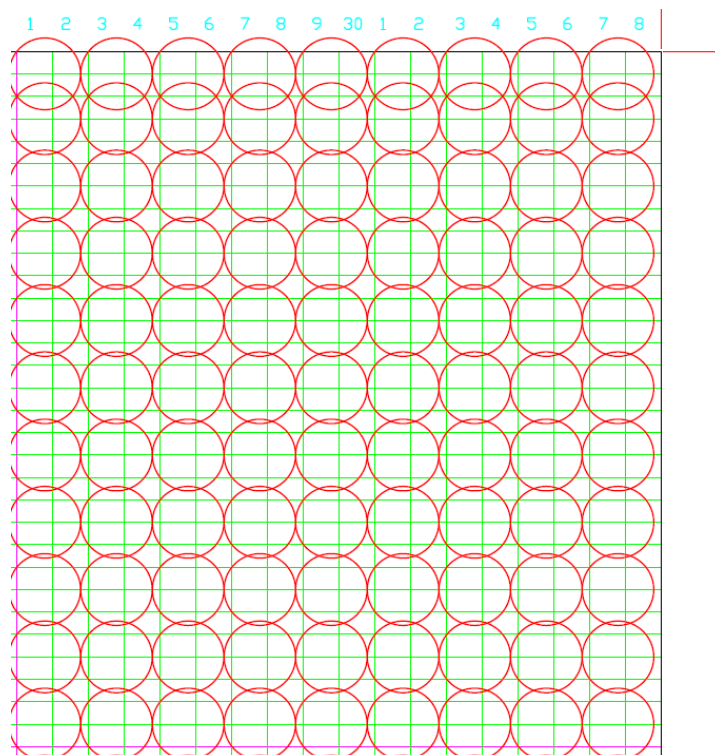

Figure 1: Global layout of the vertical airflow fans

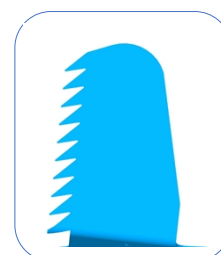

### Numbers

The layout and number of fans in this offer are based on your request or on our experience in tomato cultivation in the Netherlands. Influences such as cultivation type, temperature and air humidity may cause different required quantities. No rights can be derived from it.

An expert in cultivation and climate can help to make an appropriate offer. Ask for the possibilities.

### Paddle blade

Our fans can be recognized by the unique structure of the blades. This shape ensures that the airflow will break, which ensures noise reduction during use.

### Comments

The connection between climate computer and fans is not included. To control the HinovaFans with your climate computer, an extension of your climate computer may be necessary. Discuss this with the supplier of your climate computer.

### Guarantee

Hinova grants a 1-year warranty on the new installation materials it supplies after commissioning. The guarantee means that materials and software in which errors are present at the time of delivery are replaced free of charge. This is subject to the condition that the warranty claim is notified to Hinova within 12 months of the date of delivery.

The materials and / or software replaced under warranty must be returned to Hinova or its suppliers.
